**Gas Spill
affects
Parsonage**

The land at the parsonage has been contaminated following a gas spill at the station just to the north of us. The spill occurred many months ago and testing of the soil is continuing. There is no "health hazard" at this time, but the property has been designated "Residential Restricted". Basically it comes down at this point that we will not be allowed to put in a new well at the far end of the property (which was not in our plans anyway). We will keep you posted.
